

Find the real zeros of each function using the calculator.

1. $f(x) = 2x^2 + 5x - 3$

2. $f(x) = -x^2 - x + 20$

3. $f(x) = x^3 + 5x^2 - 7$

4. $f(x) = -2x^4 - 3x^3 + 5x^2 + 1$

5. $f(x) = 2\ln(x+3) - 2$

6. $f(x) = e^{x-1} - 3$

7. $f(x) = -2\ln(x+1) + 4$

8. $f(x) = -3e^{x-2} + 4$
